

Part 1: Problem and Plan

Part 1.1: Writing a Good Question.

For each of the graphs write a good comparative question. A question should have:

- What you are comparing (including the parameter)
- The characteristic you are grouping by
- What the population is
- Where your data is sourced from

The first one has been done for you.

To be going for Merit you need to say why you are wanting to look at these variables.

To be going for Excellence you need to use research to develop the problem.

1. I wonder what the difference is between the median weight of forward and back rugby players in New Zealand and South Africa according to a sample from <http://www.rugby-sidestep-central.com/>

1. Rugby Players Weight by Position
